```java
import java.sql.*;

class db_insert
{
        public static void main(String args[])
        {
                Connection con;

                Statement stmt;

                try
                {
                        Class.forName("sun.jdbc.odbc.JdbcOdbcDriver" );

                        con=DriverManager.getConnection("Jdbc:Odbc:vtech");

                        stmt=con.createStatement();

                        int k=stmt.executeUpdate("insert into student_info values
                        (null,'abcd',' hospet',' 1234567891','123456789012')");

                        System.out.println("Inserted");
                }
                catch(Exception e)
                {
                        System.out.println(e);
                }
        }
}
```
